

# Christiane Tabord Deillon

## Ré-Visionary artiste and illustrator

### Biography

Artist based in Yverne (Switzerland), Christiane trained in drawing and painting with different artists for about ten years before creating her own works.

Training as a geobiologist and the spiritual path that followed brought him openness to his intuition and felt subtle energies. Since then she paints to materialize and thus transmit what she perceives. His technique takes place in three phases; soul, spirit, body, which gives the work different level of reading.

She campaigns for an art of the heart, conscious and luminous through the The Re-Visionary Art Collective of which she is one of the founding members.
